

Custom nail packaging. Clearly yours.

Your market. Your identity.
Made tangible, down to the detail.

Why blend in?

Be remembered.

Distinct by design. Remembered through experience.

What makes it yours?

Shape. Color. Your
signature.

Your identity. Made tangible.

Beyond appearance?

Design the feel.

Every detail. A reason to remember.

A palette they recognize.

Use color to connect your packaging to your brand. Review the shade on a physical sample, not a screen alone.

Brand palette

Range consistency

Physical shade approval

A different kind of touch.

Compare matte and polished surfaces. Consider how the finish looks in light and feels in the hand.

Matte or polished

Light and reflection

Feel in the hand

The detail they use.

Consider brush color, density and shape together with your formula and application routine. Confirm the pairing through sampling.

Color

Density

Shape and application

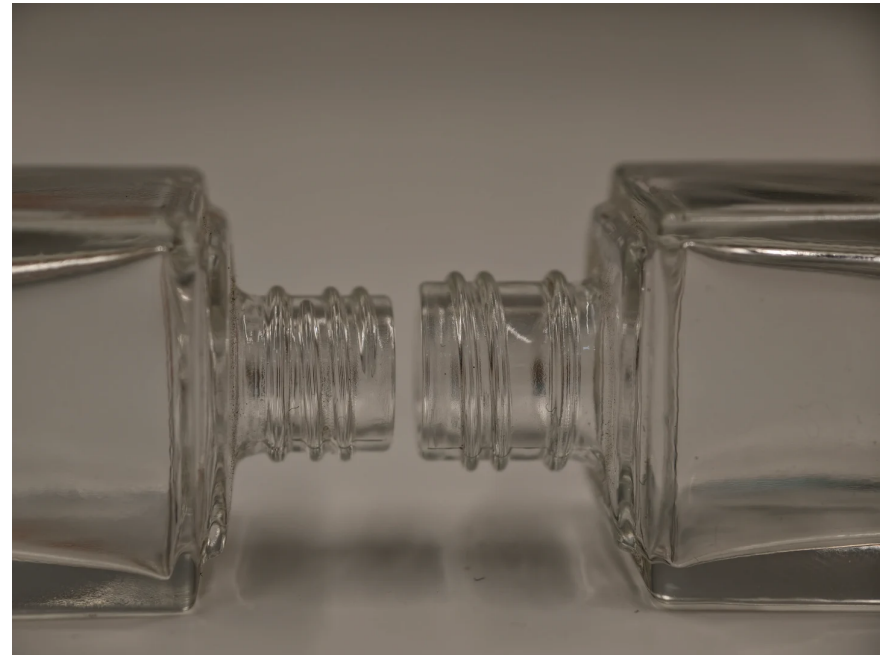

Consider the connection.

Select the neck together with the cap and brush.
Check fit, wiping and handling on the actual assembly.

Neck specification

Cap and brush pairing

Assembly sample review

**More than a name
on a bottle.**

Your identity. Made tangible.

Position. Scale. Expression.

Review your mark alongside the bottle color and finish.
Confirm the decoration on a physical sample.

Decoration samples are reviewed against your artwork.

What should your customers remember?

Start with your experience.

01 / Define

Share your market, formula and brand direction.

02 / Develop

Choose the form, finish and component pairing.

03 / Refine

Review physical samples before production.
